

MOTORCYCLE CHAIN WASH

MANUAL

Introduction

- ◆ The chain wash is designed for easy and efficient cleaning of motorcycle and moped chains, among others.

Preparation

- ◆ Before use, allow the motorcycle to cool down, engage neutral gear, and place the motorcycle on the main stand so that the rear wheel can rotate freely. For motorcycles without a main stand, a rear motorcycle stand is required.

**CAUTION: Do not clean the chain of a running motorcycle.
Danger of injury!**

- ◆ Prepare a cleaning solution, which can be a chain cleaner, an O-ring cleaner, or a brake cleaner.
- ◆ We recommend using gloves and being mindful of the risk of soiling the floor and your clothing when manipulating the motorcycle chain, used liquids and the chain wash.

- ◆ Before the first use, remove the side (white) brushes and cut them with scissors to the width of your chain.

Use

- ◆ Place the lower tray of the chain wash onto an easily accessible location on the chain and then place the upper tray on top of it and lock it by sliding it to the side.

- ◆ Secure the fastening strap with to the chain wash and tie the other end around a fixed spot on the motorcycle so the strap will be in line with the chain.

- ◆ Attach the split hose to the input holes on top of the chain wash. If using a liquid cleaner, use the included bottle, fill it with cleaner and connect it to the hose. With a spray cleaner use the hose with rubber plug, connect it to the split hose and spray directly into the plug adapter.
- ◆ Attach the remaining hose to the hole on the bottom of the body of the chain wash and insert it into the other bottle. Dirty cleaning solution and used lubricant must be properly disposed of in accordance with the law.

- ◆ Slowly rotate the rear wheel by hand and dispense the cleaning solution by pressing the bottle / applying the spray to the hose. Continue until the chain will be visibly cleaned.
- ◆ Disconnect the hoses, fastening strap, and remove the chain wash. After the chain dries, apply chain spray or other lubricant according to the instructions on the product used.
- ◆ Clean the chain wash and hoses with water and let them dry before next use.
